

ORIGAMI RISK

for Insurance Brokers

Integrated Software Solutions to Provide Added Value for Your Clients

With Origami Risk—the leading risk management information system—take full advantage of award-winning solutions and platform flexibility to gain efficiencies, expand your service offerings, help clients reduce losses, and win new business.

Values Collection

Advanced values collection tools streamline client input of exposure value data. Provide designated users with access to collection forms for the direct entry of values. Configure dashboards and reports that display collection status. Automate notifications and reminders to cut down on email and phone follow-ups.

Reporting & Analytics

Provide your clients with access to real-time analytics drawn from their data. Configure dashboards, reports, and graphs to meet client-specific needs. Automate distribution of reports to minimize the time spent on administrative activities.

Platform Flexibility & Self-Service

Designed for flexibility, Origami Risk gives you the ability to make the platform your own. Accommodate client requests, make system adjustments, and adopt new functionality when you and your clients need it. Access to administrative tools means there's no waiting for a vendor to add fields, update business rules, modify reports, or schedule secure file transfers.

Multi-Client Environment

Manage risk, claims, and insurance data for all of your accounts in a secure, unified system that allows you to share screens, fields, and codes across clients. Analyze data across accounts to provide clients with context for quotes and show how your recommendations reduce losses.

Retention Modeling

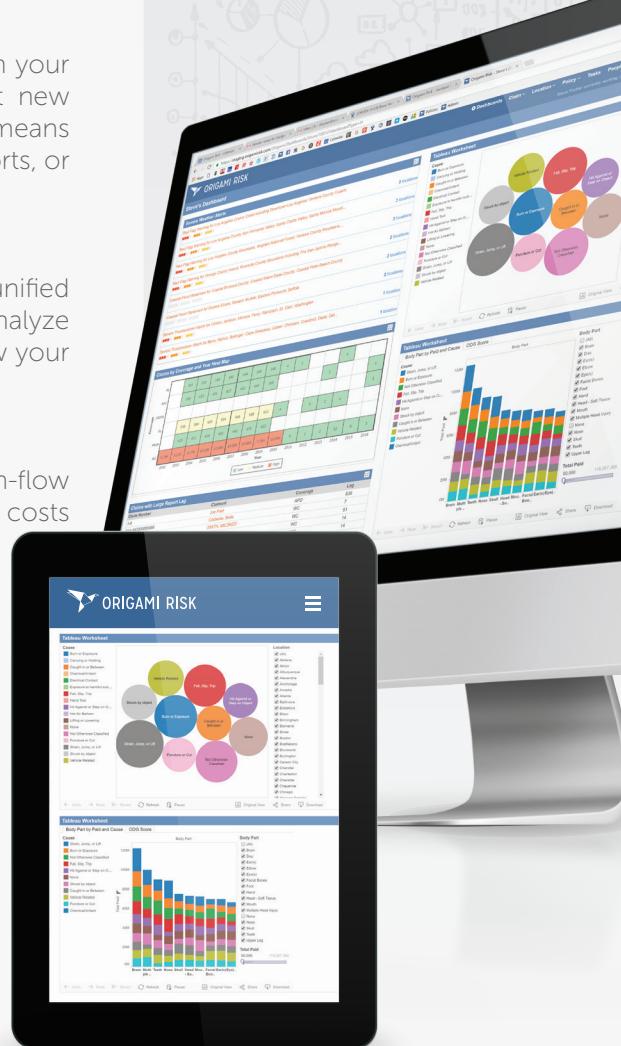

Based on a client's loss history, model retention scenarios to project the cash-flow impact of multiple retention options. Evaluate claim counts and total incurred costs by year to display the amounts a client would pay at different retention levels, making it easier for clients to determine if increasing their deductible would save on premium costs.

Data Tools and Services

Streamline the process consolidating your clients' data for analysis and reporting purposes. Import claims data from TPAs or carriers into the system. Utilize a library of predefined spreadsheets for on-demand or scheduled uploads of data. Encrypt and export data from the system using on-screen tools.

Award-Winning Technology & Professional Services

Origami Risk is consistently recognized as the #1 ranked software provider for the risk and insurance industry. What sets us apart? A singular focus on our customers' business objectives and outcomes underlies our approach to providing software and support. For us, it begins with our people—industry veterans capable of offering invaluable insight during implementation, eager to partner with clients to develop new, innovative functionality, and committed to ensuring our customers continue to take full advantage of all Origami Risk has to offer.

SERVICE

- **Experts.** We're experienced insurance and risk professionals with the perfect balance of industry knowledge and technology expertise who are ready to deliver the right solutions the first time, every time.
- **Collaborative.** A designated team partners with you to deliver a smooth implementation.
- **Consistent.** Members of your implementation team continue to see to your needs by providing ongoing, consultative support.

TECHNOLOGY

- **Secure.** Compliant with SSAE 18 SOC 2 Type II; EU-U.S. Privacy Shield; and NIST 800-53/FISMA.
- **Flexible.** Without custom coding or plug-ins, the platform can be configured to meet your changing business needs. Access to administrative tools gives you control.
- **Reliable.** Stable, always available, and incredibly fast.

FUNCTIONALITY

- **Intuitive.** Simple, straightforward design benefits both day-to-day users and those who only access occasionally.
- **Seamless.** You're always on the most recent version – no installation required. With system updates every 6-8 weeks, you don't wait months to use new functionality.
- **Effortless.** Easily automate routine, repetitive tasks and simplify workflows to free up time and resources.
